Why GA on the Most Wanted List?

- NTSB investigates approximately 1500 GA accidents per year over the last decade
- Overall GA accident rate flat
 - Has improved little over the last decade
 - Airline accident rate decreased more than 80%
- Personal flying accident rate
 - Increased 20% over last 10 years
 - Fatal rate increased 25% over that period
- **GA safety needs attention**

Lower Cost AOA Displays

- Stall occurs at a specific Angle-of-Attack
 - But not necessarily at the same airspeed

First of AOA indicators built to ASTM stds and installed as a minor mod

FAA installation policy changed

Stall Recovery

- Reduce the angle-of-attack below stall AOA (Max CL)
 - Push over to eliminate stall warning
- Level wings
- Adjust thrust
 - Avoid overspeed and high G levels
- Pitch back to level flight
- Don't try to “***Power out of a stall***”
